#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on 18 September 2003.  
 2a) This action is FINAL.                    2b) This action is non-final.

## **DETAILED ACTION**

### ***Drawings***

Figures 1 and 2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

The disclosure is objected to because of the following informalities: On page 19, line 6, 40 should be 400.

Appropriate correction is required.

### ***Claim Objections***

Claims 22-24 are objected to because of the following informalities: In claim 22, the use of the word "may" is not positive recitation. In step C, is the input a window too? This needs to be described. Also, Step D refers to "said checking step", but there are 2 above checking steps (A and C). This needs to be changed to point out to which

Art Unit: 2825

checking step is being referred. In claim 23, the levels need to be further described, IE levels of what? Similarly in claim 24, “each relating to one input” of what? Appropriate correction is required.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 22-28 rejected under 35 U.S.C. 102(e) as being anticipated by Fallah-

Tehrani et al., US Patent No. 6,405,348.

In reference to claim 22, Fallah-Tehrani teaches a method comprising checking for overlap between victim and aggressor timing windows (Figure 3, 322), translating the victim net to a context of each input of the aggressor net, checking each inputs timing window against the translated victim window (Figure 3, 324, 326), and determining that crosstalk occurs if an overlap is found in the step of checking each inputs timing window against the translated victim window (Figure 3, 328).

In reference to claim 23, Fallah-Tehrani teaches a limited number of levels (column 10, lines 1-24).

Art Unit: 2825

In reference to claim 24, Fallah-Tehrani teaches the aggressors are sub windowed according to their inputs (column 10, lines 1-24).

In reference to claim 25, Fallah-Tehrani teaches the aggressors sub windows are checked against their related translated victim window (column 10, lines 1-24).

In reference to claims 27 and 28, Fallah-Tehrani teaches both forward and backward signal propagation (column 8, lines 8-24).

### ***Allowable Subject Matter***

Claim 26 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims and correcting any objections of the base claim and any intervening claims.

### ***Conclusion***

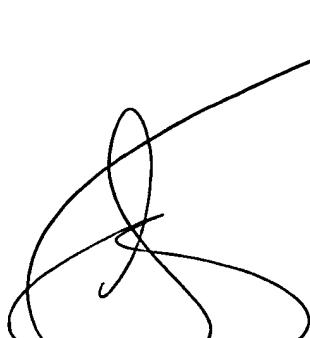

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brandon W. Bowers whose telephone number is (571)272-1888. The examiner can normally be reached on 8:30 am until 5:00 pm Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Smith can be reached on (571)272-1907. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
